951.801.0368

Product designer for web and mobile. I design thoughtful interfaces, motion and design systems, and use AI tools like Claude Code to take ideas from first sketch to something real.

Experience

Willow Laboratories / Product Designer

Dec 2021 – Present

- Design web and mobile experiences across Willow's healthcare products, from early concepts to shipped UI.
- Recent work includes the Goals and Future You features for nutu, a metabolic health app.
- Work with PMs, engineers and the health team to define flows, logic and edge cases through handoff.
- Help build and maintain the design system, and create motion, animations and 3D visuals.
- Prototype and build working designs with Claude Code.

Palazzo Salon / UI/UX Designer (Freelance)

2023

- Worked with the owners on their requirements and organized the site around what clients ask: services, prices, stylists and location.
- Designed and built a responsive Squarespace site the team can update on their own.

Projects

Nuvm / Concept brand & website

Personal project · rgomezdesign.github.io/nuvm

- Styled a furniture collection in 3D, designed an animated website and built it with Claude Code.

El Toro Loco Grill / Concept redesign

Personal project · rgomezdesign.github.io/eltoroloco

- Redesigned a local taqueria's website, from low-fi flows to a working pickup ordering demo.

Carrera Effect / Product & Brand Designer (Freelance)

2019 – 2020

- Redesigned the client's website and created branding, promo pieces and merch for digital and print.

C.S. Lewis Study Center / Graphic Designer

2019 – 2020

- Designed email campaigns, visual assets and branding aligned with the organization's mission.

Education

California Baptist University

BA in Graphic Design (Visual Experience)

- Graduated Magna Cum Laude
